Get country name Using python

Code

```python
#pip install phonenumbers

import phonenumbers

# geocoder: to know the specific
# location: to that phone number

from phonenumbers import geocoder

phone_number = phonenumbers.parse("+249968125858")

# SUDAN phone number example : +249**********
# USA phone number example   : +1***********

# This will print the country name
print(geocoder.description_for_number(phone_number,'en'))
```

Output

> Sudan
